

## MICRODERMABRASION

Microdermabrasion revives and rejuvenates skin by using an exfoliating system to reduce discoloration, remedy clogged or enlarged pores, minimize fine lines, improve acne, lessen the appearance of scars and stimulate collagen production. After a single treatment, your skin will appear radiant and revived. This non-invasive, gentle yet effective and virtually pain-free treatment requires little to no downtime. For best results, a series of four to six treatments, each in two-week intervals, is recommended.
